

STAT

PLANS AND PROGRAMS STAFF WEEKLY REPORT FOR
PERIOD ENDING 12 OCTOBER 1983

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred
During the Preceding Week:

a. LIMS - CTEC, Inc. provided P&PS with a draft of the LIMS User Acceptance Test Team Charter. The purpose of this charter is to delineate the specific LIMS acceptance testing responsibilities of the LIMS User Functional Test Staff, composed of representatives for OL, OF, and OIC. The responsibilities of the Quality Assurance (QA) Technical Test Staff and the LIMS QA Group Leader are also defined in this document. Although, to some, such planning may seem premature, the complexity of LIMS warrants detailed advanced planning if we are to develop a comprehensive test procedure for ensuring that LIMS meets our requirements. Comments on the draft charter will be provided to CTEC by 21 October.

b. Regulations Revisions

The following regulations were written, reviewed, commented upon, concurred in, or published during the past week:

STAT

General Authorities and Delegations -

Concurred, with the recommendation that the authorization contained therein for a Deputy Director or an Operating Official to redelegate any of his authorities to subordinates be expanded to include officials who are not subordinates under some circumstances.

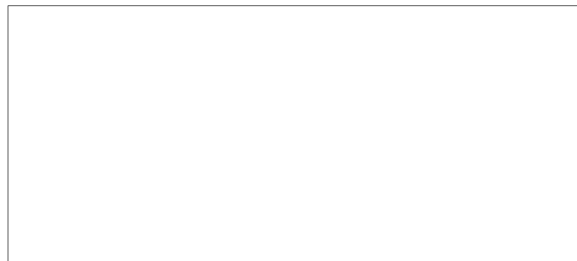

STAT

Standard Official Stationery for CIA -

Concurred. Because this notice promised that two sizes of the new letterhead paper and envelopes would be available in supply rooms, P&PD was asked to print the small envelopes on a priority basis. The other three items already had been printed and stocked.

Systems Analysis Branch/P&PS/OL
WEEKLY STATUS REPORT
Week of 3 to 7 October 1983

I. Major Activities During the Past Week:

A. Support to OL:

STAT
STAT

MISCELLANEOUS. [REDACTED] 25X1
and [REDACTED] worked Saturday, 1 October, on the GAS Enhancement Project verifying the moves of GIM software from OL development data bases to OL production data bases. A trial run of the interfaces was performed along with limited tests by the users of the new and modified routines.

STAT
STAT

All changes to the CONIF, PDMIS, and ICS OL systems relative to the GAS Enhancement Project were implemented on the production data bases on Monday, 3 October. [REDACTED] worked Monday and Tuesday night observing the DBCC operators executing the interface procedures and correcting problems as they occurred. [REDACTED] did the same on Wednesday and the process became stable on Thursday. [REDACTED]

STAT

STAT
STAT

FARS (Federal Automated Requisitioning System). The interface between FARS and ICS required by the GAS Enhancement Project has been installed. [REDACTED]

STAT

REALESTATE (Realestate System). On 6 October [REDACTED] worked with [REDACTED] Customer Services Staff, ODP, on the problem with a menu not displaying data correctly upon retrieval of RAMIS stored data. The menu was functioning properly under the previous version of the PL/I compiler. It was discovered that an additional set of parentheses is required by the new compiler version when passing parameter information from the PL/I program to an ASSEMBLER program which interfaces with the RAMIS software. [REDACTED]

II. General Items:

None to report.

III. Problems:

None to report.

IV. Upcoming Events:

None to report.
